

Dive into *A Field Guide to Mermaids*

Emily B. Martin is a park ranger with the National Park Service and an environmental educator. She is happy to tailor the content and focus of the presentation to complement your lesson plans and class subject.

Science and fantasy collide!

Join Emily B. Martin, the author and illustrator of Macmillan's *A Field Guide to Mermaids*, in partnership with Fiction Addiction independent booksellers, to explore real aquatic ecosystems with a magical twist. Discover how the author researched and designed the mermaids in the book to highlight different underwater habitats. Hear excerpts and discuss what kinds of adaptations these mermaids have. At the end, follow along as she demonstrates how to draw your own scientifically-based mermaid or merman!

Great for: Science, art, literature, reading, and writing classes, camps, and clubs

Age range: 8-14 years

Skills practiced: Water ecosystems and conservation; regional aquatic organisms; basic fish biology; nature exploration; introductory drawing, reading, research, writing and editing.

Minimum time requirement: 45 minutes

Technology requirement: Can be adapted with or without access to computer/projector

Fee: \$400; this fee is waived with the purchase of at least 25 copies of *A Field Guide to Mermaids* from Fiction Addiction Bookstore. Please note that events outside the upstate South Carolina/North Carolina/Georgia region may require travel fees.
